Smartjob

ARE YOU READY TO DISCOVER A SMARTER, MORE EFFICIENT WAY TO FIND YOUR NEXT JOB? LET'S GO

Problem

The Current Job Search Process is Inefficient and Frustrating

1. Lack of Personalization

Job platforms fail to provide tailored recommendations based on individual preferences.

2. Time-Consuming

Candidates spend hours manually searching and applying for jobs.

3. Information Overload

Job seekers are overwhelmed with a flood of irrelevant job postings.

Solutions

01 Comprehensive Job Aggregator:
Smartjob merges various job sites and telegram channels, groups into a user-friendly search platform, streamlining the job hunt process.

02 Personalized Job Matching:
Our platform suggests fitting job vacancies and relevant skill-enhancing resources based on your personalized profile.

03 AI-based Resume Creation:
Smartjob leverages AI technology for professional and visually appealing resume creation, emphasizing your strongest skills.

04 Profession Search Module:
Highlighting deep insights into various job profiles, this module provides quick access to job ads and learning resources.
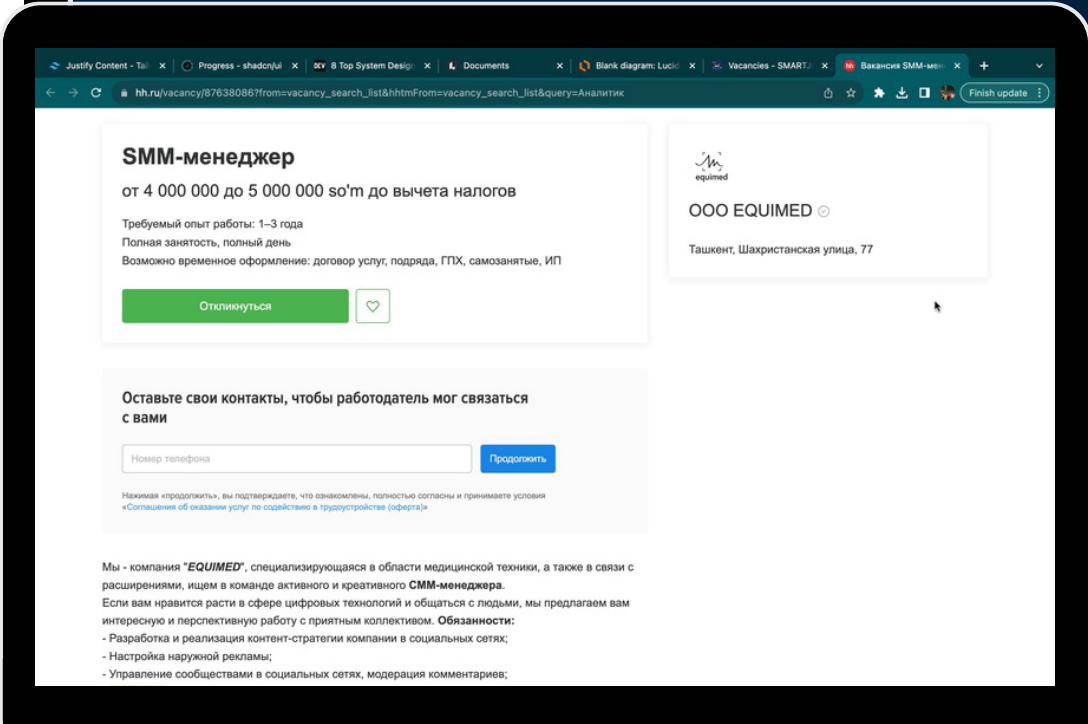

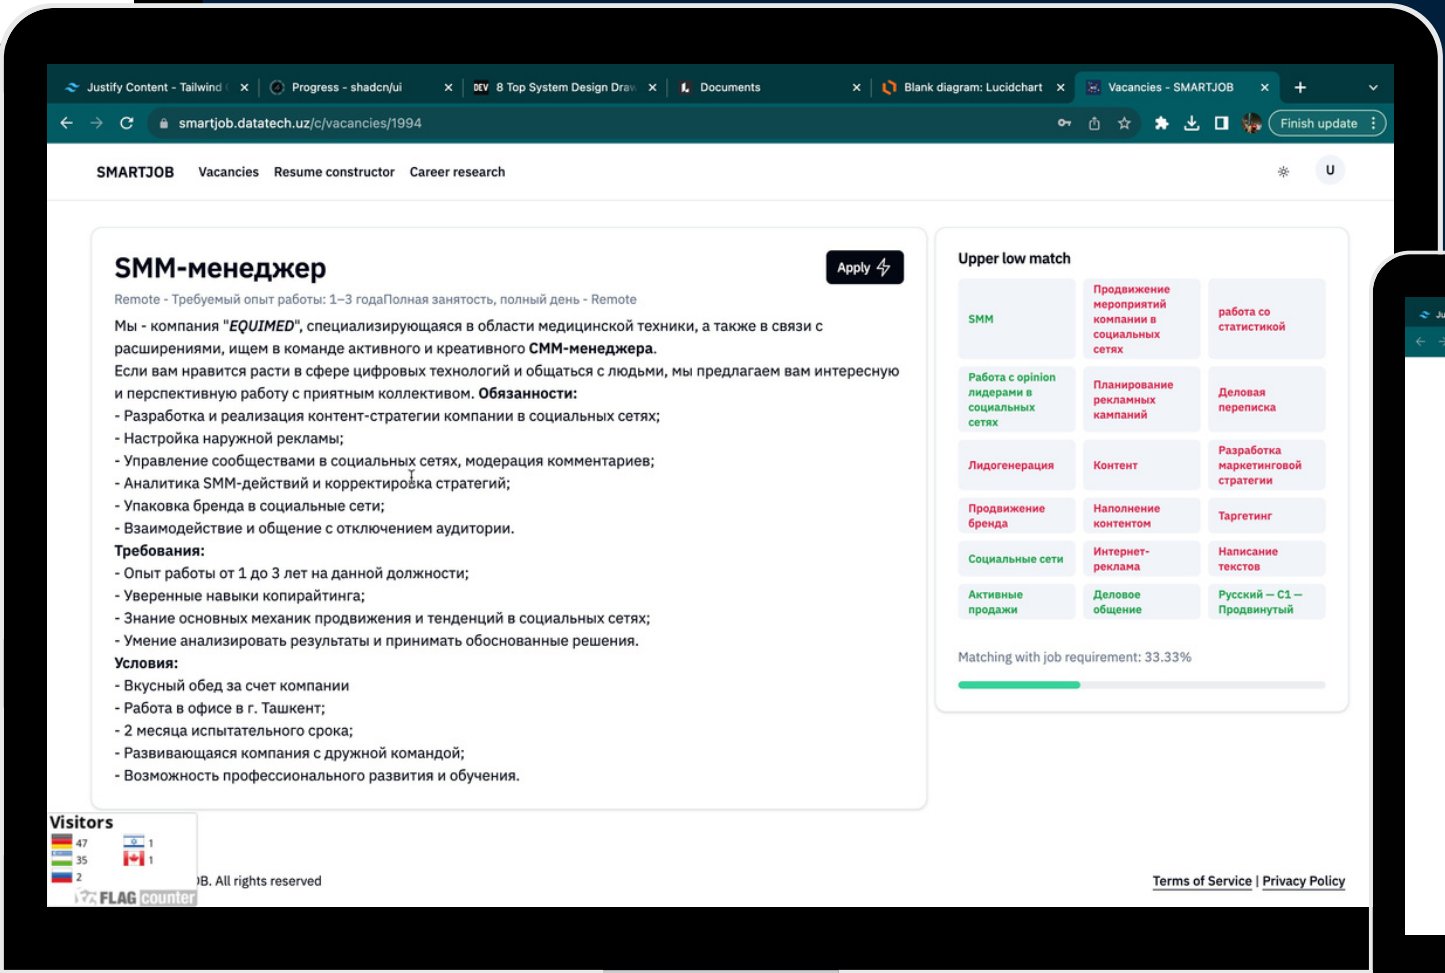

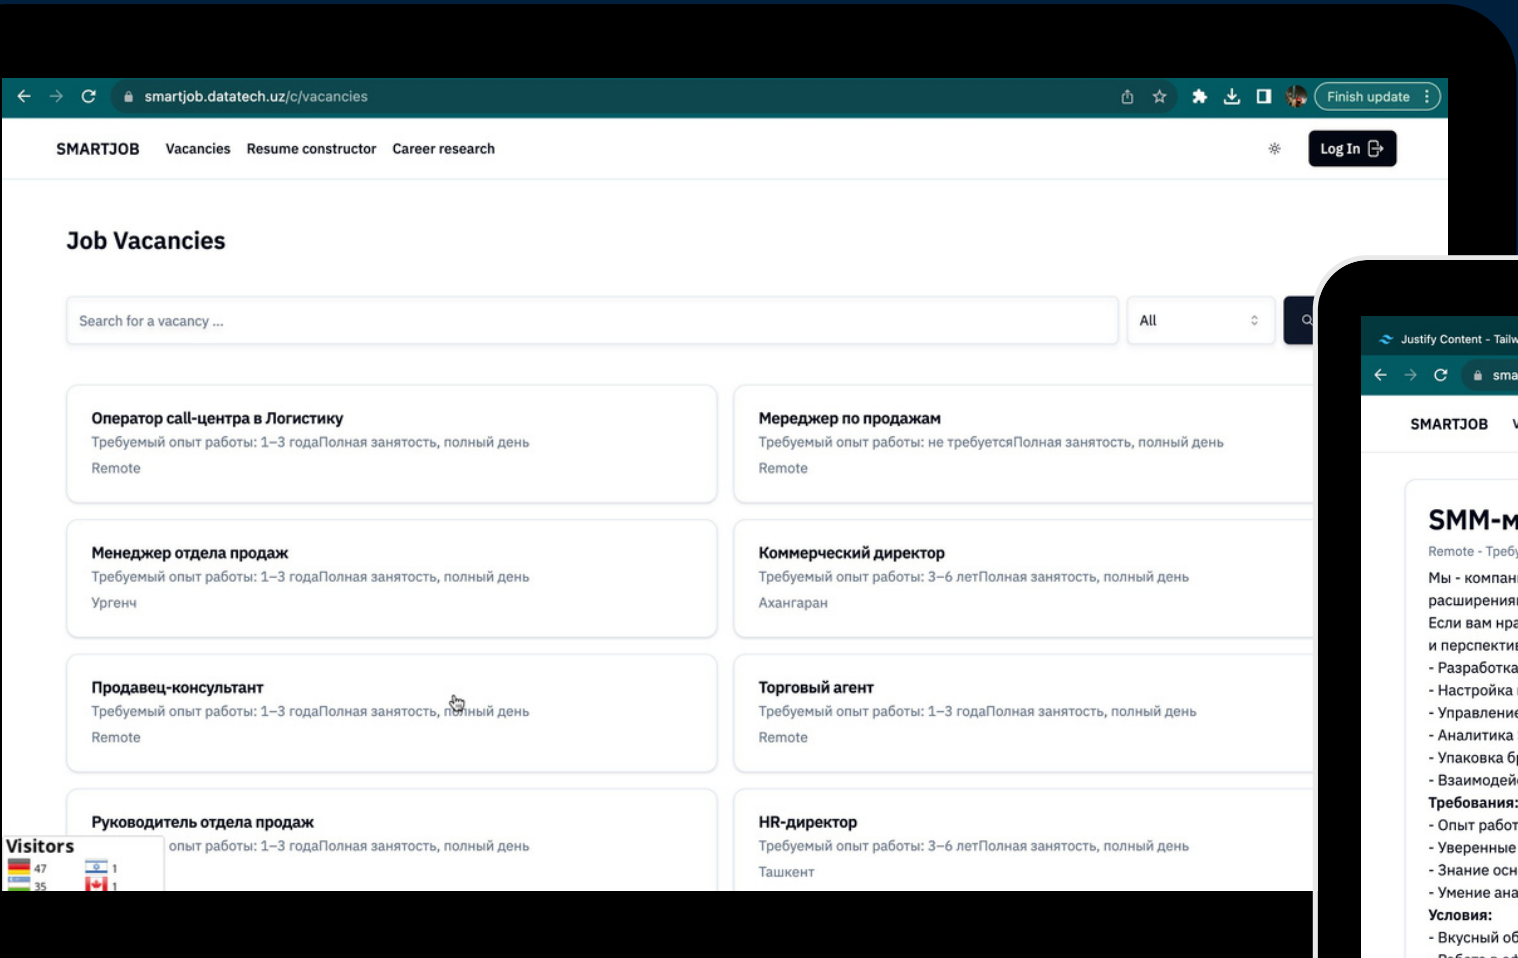

OUR PRODUCT

Profession Search Module

About the profession

Highlighting deep insights into various job profiles, this module provides quick access to job ads and learning resources.

I.Parser

1.1. Selenium - In first stage, need to populate database with data from job search web-sites like hh.uz, olx.uz, indeed.com, ish.uz using selenium bot.

1.2. Tdlib – also need to feed database with data from vacancies channel of telegram using tdlib library

II.Building API, Matching(NLP) models and front applications.

2.1. Data store part:
  • Parsed datas will be stored in database(MySQL and files for vacancies from telegram only)

2.2. Back-end:
  • Using express.js will be created REST API to get data from database and other storages

2.3. Searching:
 • Detecting matches using simentic similarity algorithms between skills and vacancy requirements

2.4. Front-end:
  • Written in Next.JS framework to establish communicable interface between application and client.

Our advantages

| NAME	SMARTJOB	HH.UZ	ONEAPP.UZ	OLX.UZ
All jobs in one place	✔	—	✔	—
Advanced matching	✔	✔	✔	—
Career research	✔	—	—	—
Telegram jobs	✔	—	—	—
